Bill –

You have, I believe, talked with Shoren Brown about this:

Every year my non-profit, which represents the entire Bristol Bay commercial fishing fleet, conducts a public meeting at the Pacific Marine Expo in Seattle.

Since one of our major thrusts is salmon sustainability and since EPA is in the midst of a Watershed Assessment in BB, we would like to invite a senior representative from Region X to briefly update fishermen on where we are in the process. I'd expect that such a presentation would not take longer than 30 minutes, including responding to a few questions.

The meeting is on November 17 at Qwest Field starting at 2:30p. Your slot would come up about 3:00p.

Thanks very much,

Bob Waldrop
